What's New in this Release

Features Added:

** Bug

   * [STREAMFLOW-130] - Admin view: List for choosing labels only shows one alternative
   * [STREAMFLOW-207] - Assign to me: Delegated task ends up in the wrong 'Mina ärenden'
   * [STREAMFLOW-208] - Account view: Error message when creating the first account
   * [STREAMFLOW-209] - Task status: Not updated correctly
   * [STREAMFLOW-211] - predefined search strings
   * [STREAMFLOW-215] - Delegated task cannot be Reopened
   * [STREAMFLOW-226] - Mail notification not sent
   * [STREAMFLOW-227] - Forms: Defining forms for a casetype - no update
   * [STREAMFLOW-228] - Forms: Not possible to choose a form for a casetype
   * [STREAMFLOW-229] - Admin view: Forms: No update when removing a form (casetype level)
   * [STREAMFLOW-230] - Admin view: Forms: Wheel-menu: Cannot move form
   * [STREAMFLOW-231] - Admin view: Forms: Done should be Klar
   * [STREAMFLOW-233] - Admin view: Forms: Name of dialog for moving form is not translated
   * [STREAMFLOW-234] - Conversations: Error message when adding particpant to a conversation
   * [STREAMFLOW-235] - Casetype: Selection dialog is not showing used casetypes
   * [STREAMFLOW-236] - Search: Strange behaviour when using skapad and dates
   * [STREAMFLOW-237] - Startup client:Security warning
   * [STREAMFLOW-238] - Renaming of dialog button 'Stäng'

* [STREAMFLOW-240] - Draft box: Should be possible to change project before a case is open
  * [STREAMFLOW-242] - Case detail view: Autoselect is not done on first possible match for casetypes and labels
  * [STREAMFLOW-243] - Case detail view: Dialog title missing for choosing labels
  * [STREAMFLOW-244] - Admin view: Project: Choose case types: Missing dialog title
  * [STREAMFLOW-245] - Admin view: Casetype: Resolution: Translation for dialog title is missing
  * [STREAMFLOW-247] - Project: My assignment: Error when creating new case
  * [STREAMFLOW-254] - Add title dialog when changing names in admin view
  * [STREAMFLOW-255] - Case detail view: Choose project dialog needs a new title
  * [STREAMFLOW-256] - Case detail view: Choose project dialog: Autoselect is not selecting first possible match
  * [STREAMFLOW-257] - Shortcut for New case does not work
  * [STREAMFLOW-260] - Project: Inbox: 'Nytt ärende' doesn't work - nothing happens!
  * [STREAMFLOW-261] - Admin view:Function: Change name changes the wrong function

** Improvement

  * [STREAMFLOW-210] - Task status: Something to show that the task has been delegated eg icon
  * [STREAMFLOW-212] - Arbetsyta: Verification on delete
  * [STREAMFLOW-214] - Add possibility to reopen an aborted task
  * [STREAMFLOW-222] - Add support for adding multiple conversation participants
  * [STREAMFLOW-239] - Rename 'Skicka'-button
  * [STREAMFLOW-246] - Case infobar: Icon and tooltip for draftmode
  * [STREAMFLOW-248] - Admin view: Choose casetype should be a grouped list
  * [STREAMFLOW-253] - Improve Forms GUI
  * [STREAMFLOW-259] - A search with no hits doesn't update the hitlist (= dosen't show an empty list)

** New Feature

  * [STREAMFLOW-213] - Arbetsyta: Delete defined "ärendetyp"
  * [STREAMFLOW-241] - Add UI for viewing the resolution set for a case

Known Issues and Limitations

None.

Installation and Configuration Instructions

To install the software, download the zip file and extract the files.
Deploy the streamflow.war file in a web-container of your choice
(recommended tomcat6).

The admin folder contains various administrative scripts (sfbkp can be used together with crontab to schedule backups).

Upgrade from 0.6.1 to 1.0

Before you start with the upgrade, please do a full backup.
The domain model for Streamflow had some big changes from version 0.6 to 1.0.
Tasks have become Cases and Agents don't have any private inbox anymore. These have been replaced by Draft.
From now on Cases can only have Project as owner and that means prior to the update we have to clean the entity store from Tasks that are owned by Users.
The following steps will do that:

- Start the streamflow console
  There is a script console available for direct entity store manipulation.
  http://<your streamflow-server>/streamflow/stramflow/v1/admin/console
  You have to log in with administration rights.
- Delete Tasks owned by users
  The following script will find all Tasks owned by Users and delete the Tasks and their aggregates.
  You may want to do a dry run before actually delete these tasks.
  You can do so by setting the content of the drop box to "Discard UoW" instead of "Complete UoW". Beware, any changes inside the text area will trigger a reload of the page and set the drop box content to "Complete UoW" again.

```
    import
se.streamsource.streamflow.web.domain.entity.task.TaskEntity;
    import
se.streamsource.streamflow.web.domain.structure.user.User;
    import org.qi4j.api.query.QueryExpressions;

    template = QueryExpressions.templateFor(TaskEntity.class);
    cases =
query.newQueryBuilder(TaskEntity.class).where(QueryExpressions.
        isNotNull(template.owner())).newQuery(uow).iterator();

    count = 0;
    for ( caze : cases ){

        if( caze.owner().get() instanceof User ){
            print( caze + " owned by: " + caze.owner().get() );
            count++;
            caze.deleteEntity();
        }
    }

    print( "Tasks owned by Users: " + count + " deleted." );
```

Documentation

Product Support

Is provided by the development team.
Bug reports should be filed at [Streamflow Jira](#)
